## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-9, 11-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added material that is not supported by the original disclosure is as follows: The second temperature coefficient is the same as the first temperature coefficient, whereas originally the temperature coefficient was claimed as being complementary. Please disclose exactly where this feature can be found in the specification (column and line numbers) and drawings (figures), if not this constitutes a new matter situation.

### ***Specification***

2. The amendment filed 2-22-05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material that is not supported by the original disclosure is as follows: The second temperature coefficient is the same as the first temperature coefficient, whereas originally the temperature coefficient was claimed as being complementary.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 20 and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Houghton et al. (USP 6,087,820). Houghton discloses a reference voltage generator circuit; see figure 1 and a current mirror section (26), the output device that provides a reference voltage response to the second current a shunt device (I2 and I3).

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
